

Processor Example Connector Configuration

This document explains the Connect Mock Product configuration which requests are processed by this Processor Example.

The Mock API created with Apiary.io tool to be used in this Processor Example is <https://vendorexample.docs.apiary.io/#> . This API does not require any Authorization to make the API calls.

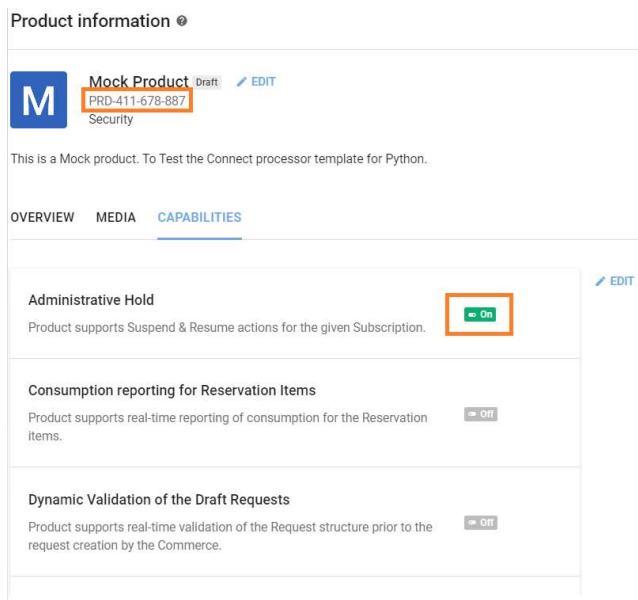

Use cases

This Example Processor supports the following use cases:

- Purchase
- Cancel
- Suspend
- Resume
- Change

Connect Mock Product Configuration

Product capabilities

The screenshot displays the 'Product information' section for a 'Mock Product' in a 'Draft' state. The product ID 'PRD-411-678-887' is highlighted with an orange box. Below the product details, the 'CAPABILITIES' tab is selected, showing three configuration items: 'Administrative Hold' (set to 'On' and highlighted with an orange box), 'Consumption reporting for Reservation Items' (set to 'Off'), and 'Dynamic Validation of the Draft Requests' (set to 'Off'). Each item includes a brief description of its function.

In order to be able to support suspend and resume use cases, this product has enabled the Administrative Hold capability in Connect general product menu.

There can be checked also the product identification, PRD-####-####-#### configured in the file Globals.py.

Items

This Mock product offers only one MPN or SKU: MPN-A, and upgrades and downgrades aren't allowed.

Parameters

Only one fulfillment phase parameter named `subscription_id`, for reconciliation, must be completed for each purchase request.

The parameter name is used in the processor to call the Connect API and complete the value, before approving a purchase request, or retrieve the value to validate the change requests.

Parameters ⓘ

+ CREATE PARAMETER

Parameters are additional pieces of information that are required to complete a purchase request. Some examples of parameters include shipping address, activation email, and etc. In the form below, you are able to configure these parameters. The parameters will be requested from the consumer while processing the purchase request.
